

We would like to enter our request and petition to you to not allow Low Power FM to eliminate the K-LOVE station. We have finally been able to listen to good Christian music in our area. There are not a whole lot of other choices in this area for good christian stations that do not have a bunch of talking and ads. They share continual stories of how lives have been touched and changed as a result of listening to a particular song or hearing some else speak about a situation they have been through. I fear that if K-Love is replaced it will not be with God-centered values. I know that my kids can listen to K-Love and I don't have to monitor every word that it said to protect them. We will all answer for what we did here on earth with what God has given us. Regardless if anyone believes that or not what happens to us when we take our last breath here on earth is out of our control. It will be a sad day for many when they realize too late that they could and should have done more with their lives. We pray that you will do what is right and seek God for your direction and uphold His morals and commands. You can begin by not letting Low Power FM erase an opportunity for many to hear a song or a testimony that could touch their lives in ways that we may never know.
